

iBMS[®] Service

Optimizing the brain of the building
Proactive and flexible support for real estate needs

What is iBMS Service?

iBMS Service, or Intelligent Building Management System Service, ensures that the brain of the building is continuously optimized to provide comfortable indoor climate in combination with minimized energy consumption and disruptions.

The Building Management System (BMS) acts as the brain of a building, seamlessly connecting and coordinating various elements such as HVAC (Heating, Ventilation and Air-Conditioning), lighting, security, and more into a centralized control system. Buildings with intelligent BMS allow for secure, remote, real-time monitoring, control, and optimization of these systems and ensure our iBMS Service offering can fully optimize the maintenance of your building.

Nordomatic specializes in upgrading traditional BMS installations to state-of-the-art iBMS installations and providing iBMS Service to provide proactive and flexible support for real estate needs.

iBMS Service

To ensure uninterrupted and optimized operations of your facility, the BMS needs continuous maintenance and supervision. iBMS Service addresses these needs by enhancing the efficiency of your property's operations, optimizing the performance of the BMS installation, and minimizing disruptions. Our iBMS Service contracts increase tenant satisfaction, lower energy consumption, and deliver an optimal indoor climate.

Proactive and Flexible Partner: Our service team supervises scheduled proactive maintenance and optimization that minimizes disruptions and solves any unexpected issues that may arise with your facilities.

Top Priority Customer: As a service customer with Nordomatic, you have the highest priority and get fast help with any disruptions. You also have the opportunity to get a personal technician, who becomes an expert on your facilities.

Service Excellence Centre

Consultations: By utilizing online support through the Nordomatic Service Excellence Center, you receive a complete solution catering to your facility's requirements and environmental goals.

Continuous Updates: Through regular and proactive actions, we gain valuable insights into your BMS installations. We provide expert input on their status and upcoming needs for actions and upgrades, which will be significant for facility managers seeking to stay informed and make accurate budgetary decisions.

Change today. Impact tomorrow.
